

**LOOK** what  
your physician  
and iCAD are  
doing to provide  
the highest  
quality patient  
care.

Physicians can more accurately detect, localize, stage, and plan and monitor the treatment of prostate cancer with advanced diagnostic imaging tools.

iCAD's VividLook advanced image analysis software is designed to help physicians identify potential cancers - ***and identify them earlier.***

VividLook provides radiologists and urologists with a more thorough diagnostic assessment which may give patients more treatment options and lead to better outcomes.

VividLook's colorized images and quantitative data assist radiologists in effectively finding potential cancers.
